

## **WARNING**

**Possible HEROIN cut w/FENTANYL in the Streets.**

**Until the product is tested for FENTANYL we can not be sure this is the case but please be aware.**

**In the last 10 days there has been  
AT LEAST  
12 suspected heroin overdoses in the area\*\*.**

**People are going into respiratory failure within minutes.**

**This immediate respiratory arrest is indicative  
of heroin cut with FENTANYL.**

**Heroin cut with FENTANYL reduces response time dramatically and requires more  
Naloxone (Narcan) to be used on the victim.**

**\*\*Info gathered from [http://www.lynnpolice.org/police\\_call\\_log.htm](http://www.lynnpolice.org/police_call_log.htm) and CAB Health  
and Recovery**
